

MEMBER'S CORNER

Mary Beth Weatherby

Caring, empathetic, concern for animals and care giving for very lucky people have characterized Mary Beth Hennessey Weatherby.

Mary Beth was raised in Pittsford, Vermont which is 9 miles north of Rutland. She diligently took many years of piano lessons. She graduated from Outer Valley High School and continued in the nursing profession following her mother and older sister. Mary Beth moved on to Barry College in North Miami where she received her B.A. degree in nursing.

After graduation Mary Beth lived in Miami for another eight years working in ICU at several hospitals. Mary Beth has many fond memories, but none outshine the time she spent at Mount Sinai Hospital in Miami Beach where she administered to many of the very lucky people (a few were actually famous).

The only justification to leave her paradise was the result of an introduction by her brother-in-law. Terry Weatherby moved Mary Beth to Maryland and finally back to his roots in St. Louis.

Together they have enjoyed traveling, antique collecting, bridge, and their three dogs. Another mutual passion is Sertoma where Mary Beth has served as Vice President of Sponsorships for a number of years. In her spare time Mary Beth has focused care giving on other very lucky people including Terry, her mother and a number of others including Gloria Low of our Sertoma family.

Mary Beth has developed both traditional and non-traditional techniques which facilitate her unique style of care giving. It is rumored the most unique technique is "Her Dr. Hymen". Even the most experienced doctors wilt in the wake of the properly administered "HDH".

Congratulations Mary Beth for being this month's "Member's Corner Sertoman".
